SUMMARY

Full-Stack Developer specializing in SaaS applications, Chrome Extensions, and business automation tools. Experienced in building commercial software products from concept to deployment, including frontend development, backend systems, authentication, licensing, payment integrations, and performance optimization. Skilled in React.js, Node.js, MongoDB, TypeScript, REST APIs, and scalable web application development.

Skills

- Frontend: React.js, TypeScript, Redux, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, JWT Authentication, Joi Validation
- Database: MongoDB, Mongoose, Database Design
- Tools: Git, GitHub, Figma, Postman, BitLabs, Jira.
- Specialized: Chrome Extension Development, SaaS Development, RBAC, Payment Gateway Integration, Performance Optimization

Experience

MAY 2025 - SEP 2025

Sparrow Softtech, Bhavnagar - *Full stack developer Intern*

Client Products: Cloud Job Manager, Cloud Donor Manager

- SaaS development , Reporting systems, Aggregation pipelines,
- Payment integrations with client's custom library
- Access control (RBAC), Production debugging, testing.
- Client communication

Education

JULY 2022 - MAY 2025

MAHARAJA KRISHNAKUMARSINHJI BHAVNAGAR UNIVERSITY,
Bhavnagar - *BCA (Bachelor of computer Application)*

Projects

QR Machine | Commercial Chrome Extension

- Developed and launched a commercial Chrome Extension for generating and exporting single and bulk QR codes (up to 1000 QR codes per batch).
- Implemented offline-first QR generation, PDF/SVG/ZIP exports, customizable QR styling, Lemon Squeezy licensing, payments, and client-side DRM.
- Optimized memory usage and performance for large-scale QR generation workflows.
- Tech: React.js, TypeScript, Tailwind CSS, Node.js, MongoDB, Lemon Squeezy

MyInventory | Multi-Tenant Inventory Management System

- Designed a multi-tenant backend architecture supporting isolated business accounts and role-based access control.
- Implemented JWT authentication, OTP verification, password recovery, and permission management workflows.
- Developed REST APIs for tenant, user, role, and membership management.
- Applied Service Layer and Repository Pattern architecture for scalability and maintainability.
- Tech: Node.js, Express.js, MongoDB, JWT, Joi

Hunger Helpers | Food Donation Platform

- Designed and developed the backend architecture for a food donation and volunteer coordination platform.
- Built 50+ REST APIs covering authentication, donations, volunteer management, notifications, analytics, and reporting.
- Implemented JWT authentication, role-based access control (RBAC), and donation lifecycle workflows.
- Developed analytics, leaderboard, reporting, and real-time notification features.
- Tech: Node.js, Express.js, MongoDB, JWT, Socket.IO
